

**Chester Jack,
Candidate for the Pennsylvania State Republican Committee**

I am a conservative constitutionalist who serves as the Republican Committeeman for the Cranberry Twp West-6 precinct. I hold an advanced degree, am a business owner and the CEO of a company that I co-founded.

As present, America is at a critical juncture in which we could lose our cherished republic. At all levels, our government has ceased to operate as our founding fathers envisioned. We need people on the PA State Republican Committee who are dedicated to righting the ship.

This is why you should consider voting for me:

- I have a track record of showing up at all BCRC meetings, asking the hard questions and challenging the status quo.
- I do my homework on the issues and candidates.
- I work with other like-minded conservative groups to build coalitions geared towards addressing the problems our republic faces.
- I am committed to pushing the BCRC toward becoming a model for other Pennsylvania Counties to follow.
- I will work with our constituents and the BCRC to understand what direction voters in our county want the GOP platform to take and will ensure that an acceptable state GOP platform is adopted.
- I will ensure that statewide candidates are recruited who are committed to our shared conservative values and who are willing to work diligently to serve the interests of the people.
- I will continue to strive to identify the best candidates at all levels of government.
- I have contributed to the fight to ensure that free and fair elections are conducted and will continue doing so.
- I will continue helping conservative candidates to get elected via direct support, increasing voter registrations and turning out the vote.
- I will do whatever is necessary to support our cause.

Some view having a seat on the State Republican Committee as little more than an impressive credential to be able to list on their resume. I do not see it that way but rather consider the role to be a serious commitment to preserving, for future generations, the liberties that we have been fortunate enough to enjoy as Americans.
